

Rishitha Pasupuleti

SOC Analyst | Incident Response

Ph No: +91 7396105817

Mail: rishitha7229@gmail.com

Professional Summary

SOC Analyst with 2+ years of experience in security monitoring, incident response. Proven expertise in using leading security tools including IBM Qradar, Splunk, CrowdStrike, and DLP solutions to detect, analyze, and mitigate cyber threats. Skilled in analyzing security logs, and network monitoring, and incident handling procedures.

Professional Experience

Senior Security Analyst — Essen vision software Pvt LTD

Nov 2024 – Nov 2025

- Handling incidents from SIEM(Qradar, splunk), Crowd strike, and DLP assisting with real-time security event monitoring, response, and reporting.
- Hands-on experience in SOC analysis operations, including monitoring, triage, and incident response.
- Experience in handling of security incidents, from detection to remediation.
- Documented security incidents with detailed findings, timelines, and recommended remediation steps.
- Utilized CrowdStrike Falcon to investigate endpoint security alerts, perform threat hunting, and respond to malicious activities.
- Knowledge on Cloud Security Solutions (AWS).
- Experience with Trellix Endpoint and Forcepoint Mail DLP at the operational level, performing incident checks and escalating violations to end-users in accordance with organizational security policies.
- Utilized the Threat Intelligence Deception Platform to analyze and investigate threat reports.
- Supported threat hunting initiatives by using open-source CTI feeds.
- Monitored the dark web to identify compromised credentials, leaked data, and potential threats to critical systems.
- Coordinated with internal teams to reset compromised credentials and secure affected accounts following data exposure.
- Assist Senior SOC Analysts and security specialists in incident investigation and workflow.
- Documented incidents involving compromised credentials and submitted detailed reports for audit and incident response.
- Regularly updated and fine-tuned SIEM rules and use cases to reduce False positives and enhance alert accuracy.

Cybersecurity Analyst — Essen vision software Pvt Ltd

Nov 2023 – Nov 2024

- Monitored security events from SIEM, firewalls, IDS/IPS, SOAR, EDR and XDR.
- General knowledge of network fundamentals, such as TCP/IP, DNS, and common network services.
- Performed triage, alert validation, incident escalation, and coordinated with internal teams.
- Performed initial incident analysis and escalated complex issues to L2/L3 teams as per defined SOPs.
- Basic understanding of security operations, threat detection, and incident response processes.
- Investigated and analyzed phishing emails using malware analysis tools to identify malicious payloads and domains.
- Experience in Providing technical support for clients, ensuring timely resolution of security issues.
- Stays updated on emerging cybersecurity trends and technologies to strengthen professional expertise.
- Strong verbal and written communication skills, with effective documentation.

Tools:

SIEM (Q Radar, Splunk), EDR (Crowd strike), DLP (Trellix, Forcepoint), Dark web (IZOO Labs) and Honeypot (Attivo).

Soft Skills:

Analytical and Logical thinking, Detail-oriented, Communication and team collaboration.

Education

Bachelor of Technology (2023)- VFSTR

Certifications

- Achieved Splunk Certified Cybersecurity Defense Analyst.
