Objective

Cybersecurity Professional With 2 Years Of Hands-On Experience In SOC Operations, Threat Detection, And Incident Response. Proficient In Azure Sentinel, DLP Monitoring, And Cloud Security Tools To Strengthen Organizational Defense, Ensure Compliance, And Reduce Security Risks.

Experience

- Proccain Consulting & Services Pvt Ltd** Jan-2024 - Present
SOC ANALYST
SIEM & Threat Detection:
 - Developed custom analytics rules using KQL and Logic Apps in Azure Sentinel for automated threat triage and response.
 - Investigated and handled high-severity security incidents such as ransomware attacks, phishing attacks, and suspicious authentication attempts.
 - Monitored alerts, correlated events, and performed investigations on Sentinel and Splunk dashboards.
 - Enhanced incident visibility by tuning detection use cases and integrating multiple log sources.**EDR & Endpoint Security:**
 - Administered and managed SentinelOne environments for endpoint protection, threat detection, containment, and remediation.
 - Performed endpoint investigations by analyzing process behavior, file hashes, and network connections.
 - Conducted malware analysis using DIE, R2, and ANY.RUN to validate threats and support incident response.**DLP & Data Protection:**
 - Monitored Forcepoint DLP and Securite DLP policies to detect and prevent unauthorized data exfiltration.
 - Investigated DLP incidents, generated compliance reports, and optimized detection rules for improved accuracy.**Vulnerability & Risk Management:**
 - Conducted continuous assessments using Nessus, Burp Suite, and risk-rating tools (Security Scorecard, RiskRecon, Bitsight, Control Coalition).
 - Identified vulnerabilities, prioritized remediation, and coordinated with IT for patch validation.**Phishing & Email Security:**
 - Led phishing awareness campaigns using GoPhish.
 - Analyzed reported emails with Mimecast and MXToolBox to identify spoofing and malicious content.**Cloud & Infrastructure Security:**
 - Monitored AWS workloads via Security Hub, Inspector, GuardDuty, and CloudWatch.
 - Enforced S3 access policies, encryption standards, and IAM compliance.**Incident Response & Case Handling:**
 - Managed investigations through TheHive, documenting containment, eradication, and recovery steps.
 - Coordinated with L2/L3 SOC teams for escalations, RCA documentation, and remediation tracking.**Threat Intelligence & Monitoring:**
 - Performed GitHub monitoring to detect exposed credentials and sensitive data leaks.
 - Conducted DNS monitoring to identify and mitigate hijacking or poisoning attempts.
 - Monitored Dark Web exposure using Flare and LeakPeek for leaked credentials and brand mentions.**Brand Monitoring / Digital Risk Protection (DRP):**
 - Monitored and mitigated phishing domains, data leaks, and brand impersonation risks to protect organizational reputation.

Automation & Scripting:(Beginner)

- Used Python and Bash to automate log parsing, IOC correlation, and alert enrichment tasks.
- Developed small utilities to streamline SOC operations and reduce manual effort.

• Futurecalls PVT LTD

Sep-2022 - Nov-2022

Cybersecurity Analyst (intern)

- Performed risk analysis to identify and mitigate security threats during cybersecurity internship.
- Utilized Nessus and Burp Suite for vulnerability testing. Certified AWS Cloud Practitioner with foundational cloud security expertise.

Education

• Dr Mgr Educational and Research Institute

2021-2023

Msc(information security & Cyber Forensics)
9.2

Skills

- SIEM : Azure Sentinel, Splunk (L1), SolarWinds SEM.
- Monitoring: Github, Darkweb, DNS, DRP.
- EDR /XDR/ Endpoint Security: SentinelOne, Sophos, Microsoft Defender.
- DLP / Data Security: Forcepoint DLP, Seqrite DLP.
- Cloud Security: AWS Security Hub, Inspector,Detector, GuardDuty, CloudWatch, S3Case.
- Management / Incident Tracking: TheHive, FreshDesk.
- Vulnerability & Risk Management: Nessus, Burp Suite, Security Scorecard, RiskRecon, Bitsight, Control Coalition.
- Phishing & Email Security: GoPhish, Mimecast, MXToolBoxDigital.
- Digital Forensics & Malware Analysis: Die Tool, AnyRun, RCA Reporting.
- IAM & Password Management: Entra ID, LastPass.
- Operating Systems: Windows, Linux.
- Security: SSL Certificate Monitoring, Encryption Issues.
- Automation & Scripting: Python (Beginner), Bash (Beginner).

Certifications

- Sc-200 (Microsoft Security Operations Analyst)
- EC-Council Incident Response
- Sentinelone-Endpoint Protection Engineer(Udemy)
- AWS Practitioner in Future calls(L1)
- Completed Certified Appsec Practitioner at Secops
